Personalised Mental Health References

Please see some of the references used to inform the presentation given by Dr Cam McDonald. This list represents some key studies used to create the presentation, and briefly summarise the body of research drawn from to generate predictive and personalised health outputs.

For more resources on the functionality of these studies after they have been synthesised into a usable format, please see www.ph360.me/health-professional

For information on courses, please contact: hpsupport@ph360.me
